## About Me

Final-year ICT student with strong problem-solving skills and technical expertise in system administration, network management, website development , mobile development and IT support. Seeking an Internship from January to May 2026 to apply technical skills, contribute to organization and gain hands-on experience as trainee.

## SCHOOL PROJECTS

### Inventory Management Dashboard

Built a full-stack inventory management system using RTK query to fetch data from backend and recharts library with Next.js, Node.js/Express, and Prisma.

### Real Estate Platform

Built A web-based property listing system built with Next.js and MongoDB, featuring user authentication, property management, and modern UI for seamless browsing and posting of real estate listings.

### AI Chatbot App

Built a mini React Native AI Chatbot using Axios and Gemini AI, enabling real-time intelligent conversations and text-to-speech responses.

### Firewall Configuration and Network Lab

Built a simulated corporate network with VLANs, routers, switches, and firewalls; configured secure traffic flow between LAN, DMZ, and external networks, applying network security and routing concepts.

## LANGUAGE

English Burmese

## SOFT SKILLS

Teamwork and collaboration Adaptability and flexibility  
Eagerness to Learn Analytical Thinking
