- Backend: Node.js, Express.js, REST API development
- Database: MongoDB, SQL PostgreSQL
- Programming Languages: JavaScript , TypeScript, Python, Dart
- Tools , Services & Platforms: Power BI , Git

About Me

Final Year ICT student with practical experience in mobile app development using React Native and full-stack development using React.js, Node.js, and TypeScript. Passionate about creating scalable and efficient applications. Seeking an internship from January to May 2026 to apply technical skills, enhance expertise in mobile and full-stack development, and gain hands-on industry experience.

PROJECTS

E-commerce App (Clothing Store App)

Built a Clothing Store E-commerce App using React Native, TypeScript, Zustand for state management, and Supabase backend. Implemented authentication, product catalog, cart, and order management with real-time updates and smooth user experience.

AI Chatbot App

Built a mini React Native AI Chatbot using Axios and Gemini AI, enabling real-time intelligent conversations and text-to-speech responses.

Flutter Employee Management App

Developed a mobile application with login/signup using SharedPreferences and dynamic employee list loading from JSON. Implemented a navigation drawer to pass user details across pages and designed a clean UI with Material Design and Dart.

LANGUAGE

English   Burmese

SOFT SKILLS

Teamwork and collaboration   Adaptability and flexibility

Eagerness to Learn   Problem Solving & Analytical Thinking
